Hyper-V Diagnostics.

Syvir Remote HV Diagnostics enables system administrators to perform remote diagnostic checks on virtual machines.

Check your remote Windows Hyper-V, virtual machines for virtual hardware problems all with Remote HV Diagnostics.

Cloud based, view diagnostic information through a web browser.

Manage endpoints from anywhere in the world.

Syvir Remote HV Diagnostics is the easy way to find out if any of your VMs have virtual hardware issues.

SYVIR Remote HV Diagnostics works through a small program on the target virtual machine.

Run the client software on the virtual machine through Remote Desktop.

Data is transferred from the console probe to the SYVIR cloud.

You can then view diagnostic data through a web browser.
